Computer Science Student · Educator · IT Technician

Monrovia, Liberia

Professional Profile

A dedicated Computer Science student and IT professional based in Monrovia, Liberia.

Experienced in supporting technical systems at the Ministry of Transport and delivering instruction to students at Conquerors Academy.

Committed to building education-centered digital solutions and strengthening public service technology.

Experience

IT Technician, Ministry of Transport

- Support and maintain digital systems used by government service teams.
- Troubleshoot hardware, software, and network issues across agency systems.
- Help optimize operations through technology and documentation.

Instructor, Conquerors Academy

- Teach computer science concepts and technology skills to students.
- Guide project-based learning and academic development.
- Build curriculum support for digital literacy and technical training.

Education

Senior Student, Apex University - Computer Science & Technology

- Focus on software development, systems design, and digital innovation.

High School Diploma, Christian Missionary High School

Skills

- Software development: web applications, dashboards, and school management systems.
- IT support & technical administration for organizational systems.
- Educational instruction and curriculum support.
- Mobile & web app planning and user-centered digital product design.
- Digital systems for education, government services, and youth development.

Selected Projects

- School Management System: Developed a dashboard for student information, attendance tracking, and grade reporting.
- Government Service Portal: Designed a platform to streamline public service operations and citizen access.
- Educational Analytics Dashboard: Created real-time insights into student performance, curriculum delivery, and institutional metrics.

Vision

To build impactful digital solutions that improve education systems, public services, and youth development in Liberia.

Personal Interests

- Educational technology
- Public service innovation
- Digital systems for positive social impact
